

NG

Natural Gas-Heated, Hot Water Generator That Attaches to a Cold Water Pressure Washer

- Up to 3000 PSI
- Increases incoming water temperature by up to 150°F
- Schedule 80 Heating Coil
- LP Conversion Option

Why Choose the NG Hot Water Generator

The NG-3000 is a stationary, natural gas-heated hot water generator that can be attached to a cold-water pressure washer making it a hot water washer.

The NG-3000 does not have a pump but simply heats the pressurized water—as much as 150°F above the water's ambient temperature, depending on the flow rate—so it can be used for cleaning the toughest of cleaning challenges.

There are two models—NG-3000 and NG-3000LM—able to heat water at flow rates of up to 10.6 GPM. Both models can be converted to LP gas.

The NG models are packed with quality throughout, including Schedule 80 heating coil, high-efficiency burner, rugged steel frame and a raised platform for easy positioning in a shop.

NG-3000LM

Shown with optional support table

NG-3000

- Extra-durable **Heating Coil** made of leak-free, cold-rolled, Schedule 80 steel pipe with five-year warranty.
- Rugged 12-gauge steel **Chassis** protected by weather-resistant epoxy powder coat paint.
- Triple **Safety Protection**, including a rupture disk, high-limit thermostat, and flow switch to prevent the buildup of excessive pressures or heat.
- High-efficiency **Burner** with millivolt ignition and standing pilot; also Honeywell gas valve.

■ Helpful **Tri-Lingual Labels** with operating instructions in English, Spanish and French for owner and operator protection.

■ 9 feet of wire-braid **Hose** with coupler for connecting to a cold water pressure washer.

Model #	Part #	Fuel	GPM	PSI	Max BTUs	Ship Wt (lbs)
NG-3000	1.103-901.0	Natural Gas	Up to 6	3000	420,000	450
NG-3000LM	1.103-902.0	Natural Gas	Up to 10.6	3000	800,000	900
