

A15 and A17

Air-Operated Vacuums.

Whether it's performing maintenance on the banks of a major shipping yard or constructing a brand new building, there are times when electricity is either a safety hazard or simply unavailable. Nilfisk CFM's A15 and A17 pneumatic vacuums were developed in response to customers' needs for compressed-air vacuums that pack the same punch as electric-run industrial vacuums.

The A15 and A17 use air pressure generated by a compressor which is driven through a venturi inside the vacs to create powerful suction. Because the venturis have no moving parts like electric motors, the units are very low maintenance.

The A15 is compact and maneuverable, well suited for confined spaces and transportation to remote locations. The larger A17 can handle heavy-duty chores and features a large 26-gallon tank. It can also be equipped to collect liquids and other wet hazardous materials.

- Low noise level for operator comfort
- Large main filter provides more surface area for filtering and resists premature clogging
- External filter shaker keeps the main filter free of clogging dust and helps maintain maximum suction power and filtration performance.

Both machines are available in stainless steel and can be fitted with optional HEPA filters and an array of anti-static filters and accessories.

Applications

Shipyards, construction sites, woodworking shops, powder coating booths, oil refineries, and rifle ranges are just a few of the most common applications for these vacuums.

A17

Technical Features		A15	A17
Air consumption @ 90 psi	cfm	30	56
Waterlift, max.	inches H2O	157	177
Airflow, max.	cfm	99	240
Noise level @ 3'3" (1 meter)	dB(A)	70	78
Filter area, main filter	sq. ft.	7.5	21
Filter area, HEPA (optional)	sq. ft.	11.8	60
Tank capacity	gallons	6.6	26
Machine inlet	mm	50	70
Dimensions (L x W x H)	inches	19.7 x 21.6 x 37.4	34 x 27 x 54
Weight	lbs.	53	150
Airline diameter	inches	1/2	3/4
Airline, length	feet	30	20

Accessory holder on A17

A17: Stainless steel with filter shaker

Wheeled collection container

A15 options: HEPA filter and collection container fitted with an inlet, paper bag, and cap for safe recovery
