We Know How To Get Things **CLEAN**

The Ultimate Cleaning Muscle

Nilfisk CFM T Plus Series: Three-phase Industrial Vacuums

T Plus Series

Introducing Nilfisk CFM's new generation of three-phase industrial vacuums, the T Plus series. Comprised of the T26 Plus, T48 Plus and T63 Plus, these machines allow customers an opportunity to have a "tailor made" industrial vacuum cleaner. With a smarter design, the new T Plus Series can easily accept a wide range of options and upgrades. These vacuums efficiently collect a variety of materials, including toxic, hazardous, and nuisance dust, debris, and liquids. Every feature is engineered to make daily cleaning in production areas and process manufacturing fast and hassle-free.

- Lightweight and highly maneuverable, the T Plus series vacuums feature rear swiveling wheels with locking brakes.
- A unique release lever lowers the wheeled collection container and acts as a handle for fast and easy disposal of collected debris.
- Low noise operation, the T Plus vacuums are quiet, increasing worker safety and comfort.
- Possible electrical upgrades include automatic filter cleaning, wet or dry level sensors or remote start/stop.

Construction: The T Plus series is constructed of a heavy duty steel frame, stainless steel collection container and polypropylene lid.

Filtration systems: The T Plus series come standard with a high efficiency main filter and upstream HEPA filter which ensures that 99.995% of particles are retained, down to and including 0.18 microns in size. This exceeds HEPA filter standards. An optional downstream exhaust ULPA filter or activated carbon filter is available.

Filter cleaning systems: The T Plus series machines come standard with a manual filter shaker that quickly removes caked on dust from the filter's surface, maintaining the vacuum's maximum suction power and improving productivity.

Collection options: For easy cleaning and improved sanitation, the T26 Plus, T48 Plus and T63 Plus comes standard with a 26-gallon stainless steel collection container. Also available with a dust bag or Longopac® Collection System for safe disposal of toxic and hazardous material.

Description	Units	T26 Plus	T48 Plus	T63 Plus
Voltage @ 60Hz	Volts	220 / 460 / 575	220 / 460 / 575	220 / 460 / 575
Power, max	kW	2.6	4.8	6.3
