

a new spin on cleaning

Marathon 350 Carpet Spotter

Go-anywhere design,
professional extraction
performance

Professional Performance

Tackle upholstery, staircases, drapes, and other challenging cleaning applications with the Marathon 350 spray extraction cleaner. Move from room to room with ease with this highly mobile electric unit. This compact unit is perfect for cleaning auto interiors and for spot cleaning office areas and retail sales floors. The unit can even handle your spray extraction needs for small carpeted areas. The Marathon 350 sprays solution deep down into carpet, dissolves dirt, and recovers the dirty solution with ease and efficiency.

With a compact design and quiet operation, the units are favorites with health care and educational facilities as well as commercial buildings, restaurants and retail stores. The user simply sprays solution through the jet-sprayed pump and recovers the dirty solution through the included clear-view tool.

Features You Want

The Marathon 350's solution tank has a filter for pump protection as well as a convenient water level indicator. The recovery tank doubles as a removable bucket that is easy to carry and dump when full. The Marathon 350 includes a spray suction hose, floor tool, and utility hand tool. Accessories are storable in the separate accessories holder, and two large transport wheels and two front castors allow the unit to smoothly follow the operator's movements during use.

Marathon 350 Carpet Spotter. Go-anywhere design, professional extraction performance.

NEW!

Marathon 350 Carpet Spotter

Versatility

The Marathon 350, compact, carpet extractor can be used in a variety of environments including:

- Automobiles
- Commercial buildings
- Hotels
- Hospitals
- Residential homes or apartment buildings
- and more

Versatile
The Marathon 350 is perfect for hotel rooms, offices, auto interiors and a variety of other applications.

Ease of Use
Solution and recovery tanks are removable for easy transport and disposal.

Convenient
A separate accessories holder and the unit's mobility are among several features that make for ease of operation.
