

Room-Mate Carpet Extractor

Effortless Operation and
Maximum Productivity

Maximum Performance

Designed specifically for use in apartments, hotel rooms, or similar applications, Tornado's Room-Mate portable carpet extractors are perfect for everything from interim maintenance to deep restoration cleaning. Whether you're a certified carpet technician, carpet cleaning specialist, or a member of the maintenance team, you will appreciate the smart features and convenience the units afford.

Constructed of durable rotationally molded polyethylene, these units reflect Tornado's commitment to design standards that will endure the rigors of daily usage. The units have a compact vertical design, affording ease of storage, mobility and operation. With simple, user-friendly controls the Room-Mate can be operated with minimal training.

Tank-Less Operation

Without a built-in solution tank, Tornado's Room-Mate allows operators to use a bath tub, sink, or even a bucket as the solution / water source. With the unit designed to sit in place as a cleaning station, the operator is handling only the hose and wand as they clean, affording the convenience of a truck-mount, but in a portable unit.

Plus, the dump valve on the recovery tank is set to ADA height standards and allows the recovered solution to be drained in a standard toilet.

The Room-Mate gives operators the ability to quickly set-up, extract and move onto the next cleaning site with ease. Tank-less operation improves productivity and reduces costs.

The Room-Mate. Tank-less operation and unmatched performance.

1. 13 gallon Recovery Tank.
2. Recovery Tank Dump Valve
3. Vacuum Hose Attachment
4. Solution Line Attachment
5. Control Panel
