

## The Windshear™ 3000 Blower/Dryer.

Simple drying innovation  
in an economic package

### Rugged Construction and Durability

Dry your spaces faster and easier with the Windshear™ 3000. Designed from the ground-up by Tornado® engineers, the Windshear™ 3000 Blower/Dryer combines innovation, rugged construction, and common-sense design in an economic package. The Windshear™ 3000 is the answer for drying carpets, upholstery, or hard floors, and helps to ensure greater safety in any facility.

### Unmatched Professional Performance

This go-anywhere unit is a durable, rotationally-molded dryer with sensible features and unmatched professional performance. The Windshear™ 3000 is perfect for use after fire, flood, or other water damage as well as for drying wet floors during rainy or snowy seasons. The Windshear™ is also appropriate for general air circulation in almost any facility.

### Versatile

The motor is mounted at four points instead of a typical three-point mounting. This design serves to reduce noise and vibration as well as increase the machine's life. A three-speed switch permits airflow selection of 1600, 2000 and 2500 CFM. Airflow may be directed at three angles (0, 30, and 90-degrees), and the units are stackable for easy storage.

Perfect for drying:

- Carpets
- Rugs
- Hard floors
- Cabinets
- Dry wall
- General air circulation
- Paint
- Draperies
- Upholstery
- and much more

# The Windshear™ 3000. Simple innovation in an economic package

## Key Features

- Space saver stackable design takes up less room in storage
- Easy transport with molded-in handle
- Reinforced motor lugs to prevent damage in transport
- Built-in three angle adjustment for drying or general air circulation
- Rotomolded high density polyethylene housing for rugged durability

## Flexibility

The Tornado® Windshear™ 3000 provides easy operation, durability and versatility for use in many different environments including:

- Hospitals and Healthcare Facilities
- Schools and Universities
- Hotels and Resorts
- Restaurants
- Commercial Office Buildings
- Retail Stores and Shopping Malls
- Industrial Facilities, large and small
- Restoration Cleaning
- and more

WINDSHEAR™ 3000

### Carrying handle and cord wrap

A handle is molded-in for easy transport. The power cord can be conveniently stored when the Windshear™ is not in use.

### Stackable storage

Space-efficient storage is simple in corners or closets thanks to molded-in stacking ribs.

### Three-angle adjustment

Angle adjustment is a built-in feature of the Windshear™. The unit's contours have been designed to permit operation at three angles. Screw in height-adjustment feet, which often get bent or lost, are eliminated. Four rubber shoes absorb vibration and provide stability. Place the unit flat for drying floors or at a 30 or 90-degree angle for drying walls or general air circulation.

PRODUCT SPECIFICATIONS	
MODEL	WINDSHEAR™ 3000
CATALOG NUMBER	98772
POWER	115V / 60Hz
SPEEDS	3
AIR-FLOW	2,900 max
AIR-FLOW DIRECTION	0° / 30° / 90°
MOTOR	.5 HP
MOTOR RATING	Continuous Duty
HOUSING	Polyethylene
HANDLE	Molded In
STACKABLE	Yes
POWER CORD	25' (18/3)
SIZE (H X W X D)	18" X 14" X 20.5"
WEIGHT	30 LBS
